

# EP-200

*Powerful 2-CIS Value counter*

*Dual CIS  
Value Counting  
Authenticating  
Various Counting Modes  
Dust Cover  
Small Footprint  
Minimize feeding trouble  
Ionizer (Option)*

*EP-200* is a compact and powerful cash handling device equipped with two Contact Image Sensors. With small footprint and high economic feasibility, it can be installed even on a small teller's table or in the limited space of an exchange office.

The simple and robust structure of the EP-200 enables a wide range of applications, from teller windows to back offices in bank branches, casinos, cash centers, exchange offices, and retail cashiers, among others.

The dust proof cover ensures minimal dust emission and noise from the unit. Users can feel comfortable and free from the anxiety of notes flying-out.

#### *Various counting modes*

EP-200 supports various counting modes, including MIX (counting mixed denominations), DD (sorting by denomination), FACE (sorting by face), ORT (sorting by orientation), CNT (piece counting), ISSUE (sorting by issue), SRL (reading serial numbers), BARCODE (reading barcode of tickets), etc.

#### *Improve authenticating feature*

With two CIS and full UV scanning, EP-200 offers enhanced authenticating feature than EP-100. The counterfeit detection performance has been significantly improved compared to the previous EP-100 model.

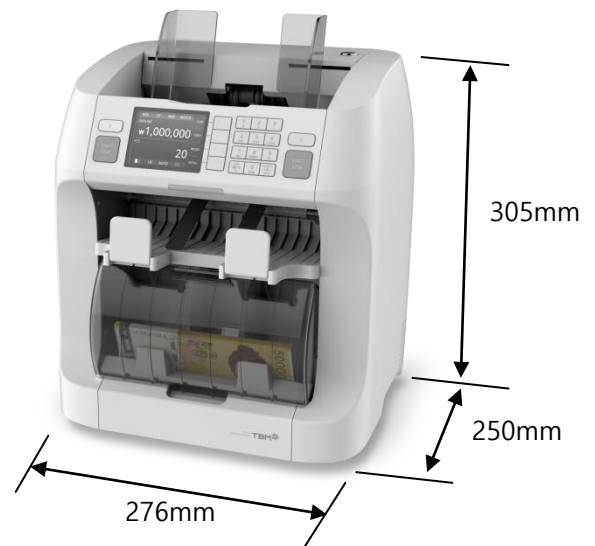

#### *Access to the entire note path*

EP-200 was designed with two openings for easy clearance of jams and maintenance task.

#### *Technical Information*

Hopper capacity	300 notes
Stacker capacity	200 notes
Reject capacity	100 notes
Speed	1,000 / 800 npm
Note size	W: 120 ~ 180 mm H: 60 ~ 90 mm
Note thickness	0.08 ~ 0.12 mm
Power	100 ~ 240VAC, 50/60Hz
Power consumption	50W
Weight	Approx. 7.8 Kg
